

NEW: SecuFast® 7-Star

SecuFast® 7-Star

Douwes has continued to collaborate with its manufacturer when it comes to innovation. This has led to the development of a new security screw.

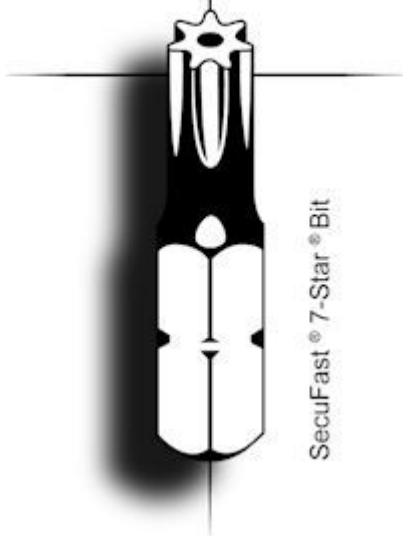

The result is the: SecuFast® 7-Star.

The 7-lobe head makes this a unique security screw.

The SecuFast® 7-Star is now available as a machinescrew M6 in lengths 12 and 40 mm.

We will be expanding the range to include M4, M5 and M8 diameters later this year.

Material: Stainless steel A2.

SecuFast® 7-Star Bit

You can only fix the SecuFast® 7-Star screw using the special, accompanying, bit.

The SecuFast® 7-Star bit is exclusively available via Douwes and is only sold in combination with the purchase of screws.
